

ENVIRONMENTAL POLICY

Seaspan ULC is committed to conducting its operations in a manner that is environmentally responsible. Care for the environment is our Core Value and is the foundation of this policy. Seaspan ULC manages all phases of its business in a manner that minimizes the impacts of its operations on the environment and demonstrates our care for the communities and customers we serve.

TO FULFILL OUR COMMITMENTS, WE WILL:

- Continually demonstrate Care for the Environment as one of our Core Values at Seaspan.
- Meet or exceed compliance with environmental laws, regulations and voluntary commitments applicable to our operations.
- Aim to achieve zero spills of harmful substances and minimal impact of our operations on the environment.
- Employ an integrated risk-based approach to the management of our environmental systems and processes, upholding our Seaspan brand.
- Effectively communicate our environmental performance to employees, suppliers, regulators and customers, as well as the surrounding community.
- Enhance the competencies of our people through training and development.
- Establish meaningful environmental objectives and targets.
- Follow the principles of sustainability and demonstrate responsible business practices in the use of energy, materials, and services.
- Regularly review the effectiveness of our systems and processes and the achievement of targets, to demonstrate continual improvement in Seaspan ULC's environmental performance.
