BUILDING CANADA'S NATIONAL, STRATEGIC ASSETS. REBUILDING AN INDUSTRY

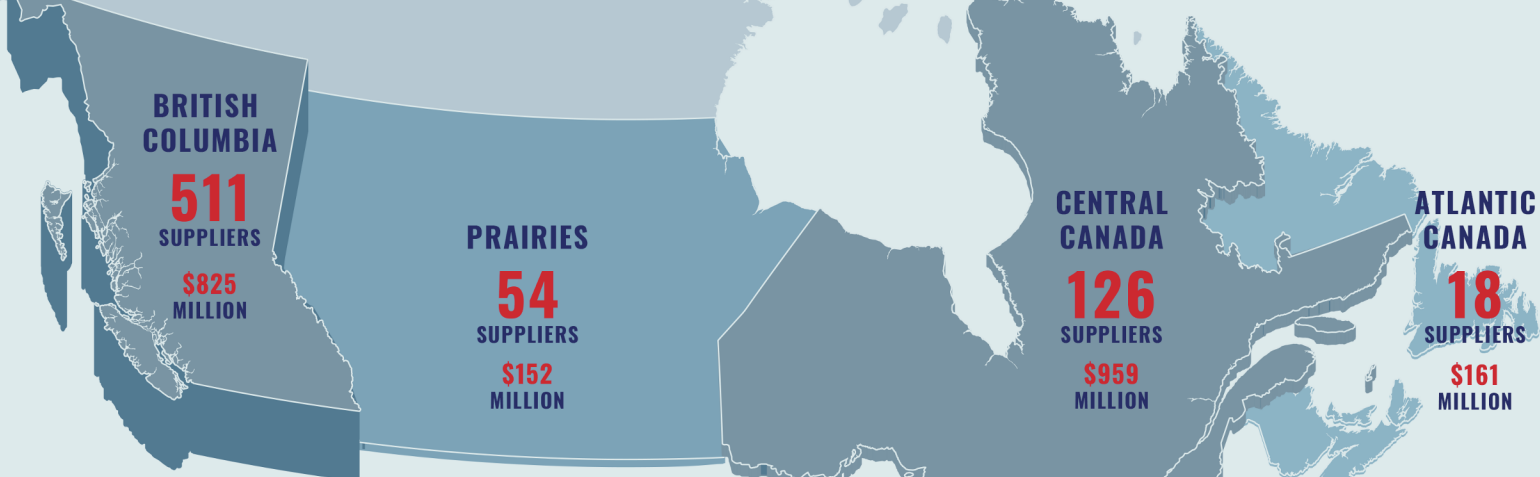

Seaspan Shipyards is Canada's strategic partner under the National Shipbuilding Strategy (NSS) – rebuilding a sustainable, thriving shipbuilding industry of strategic importance to Canada that is delivering ships, economic growth and jobs.

THE NATIONAL SHIPBUILDING STRATEGY IS WORKING

Seaspan is delivering ships, economic growth and jobs, and rebuilding a sustainable industry.

- **Delivered ships:** First class of vessels under the National Shipbuilding Strategy, cut steel on next two
- **Driven economic growth** for BC and Canada
- **Built robust supply chain:** 700+ Canadian businesses
- **Developed Canadian marine industry**
- **Established Vancouver Shipyards as a strategic national security capability**, at a time of growing global instability

REBUILDING A SUSTAINABLE SHIPBUILDING INDUSTRY

INVESTING IN A ROBUST CANADIAN SUPPLY-CHAIN

Seaspan has helped establish a new shipbuilding ecosystem in Canada that did not exist 10 years ago. We now have a high-functioning Canadian supply chain of 700+ companies; more than half are small and medium-sized Canadian businesses.

A SIGNIFICANT ECONOMIC ENGINE FOR BC AND CANADA

\$2.6B in contributions to GDP from the National Shipbuilding Strategy (2012-2021)

\$2.1B in subcontracts to Canadian companies since 2012

A CULTURE OF DIVERSITY AND INCLUSION

Seaspan values diversity, and we work to foster a culture that is respectful, inclusive, and reflective of all the people who live in our region. We are committed to supporting and growing a diverse workforce, and collaborating with local communities to create meaningful opportunities for Indigenous people.

PRIORITIZING ENVIRONMENTAL SUSTAINABILITY

At Seaspan, we believe in acting local and take great pride in our Core Value of Care for the environment and the habitat around us in the communities we serve. We acknowledge that our business activities have an impact on the environment within which we operate, and we are fully committed to minimizing this impact by adhering to rigorous environmental standards and related programs.
