Seaspan Shipyards Launch NSPS Website

For immediate release – July 5, 2011

North Vancouver, BC -- We've launched a new website dedicated to our efforts to win a significant portion of the \$35 billion Federal Government's National Shipbuilding Procurement Strategy (NSPS) program.

www.seaspanforNSPS.com

The site highlights the company's shipbuilding legacy, current construction projects and shipyard facilities, as well as NSPS economic benefits and why it is so important to bring a portion of this contract home to BC.

"We are launching this new website to give interested Canadians a chance to learn more about the National Shipbuilding Procurement Strategy (NSPS), Vancouver Shipyards and Seaspan Marine Corporation," said **Jonathan Whitworth**, Seaspan CEO. "NSPS is a once-in-a-lifetime opportunity for the people of British Columbia and is projected to create thousands of jobs within the BC shipbuilding industry for the next 30 years. Seaspan has the backing of our Provincial and Municipal Governments and are working hard to gain even more momentum and support."

If you would like to show your support of the BC shipbuilding industry and our NSPS bid, please add the graphic below to your email signature (for your convenience a .gif version of the logo is attached with this release):

Stay tuned for further additions to the site coming in the near future.
